

purifix[®]

Universal sample preparation for reliable molecular analysis

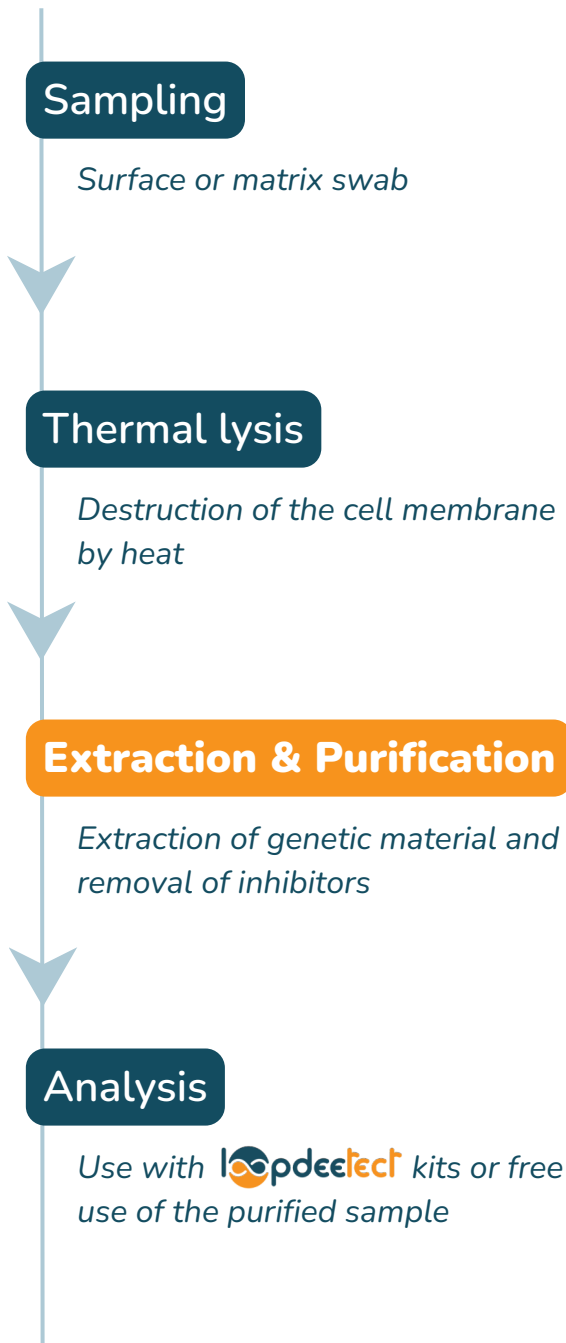

Built for performance, flexibility and field use

Extraction & purification solutions

PurifiX® is a range of devices and kits designed for extraction and purification. A **critical step** used to **isolate target compounds from complex matrices** while removing substances that may interfere with analyses.

Global analysis workflow

Use cases

The extraction and purification step with the PurifiX® range can be followed by any DNA/RNA analysis type, such as:

Sequencing

PCR

LAMP

Good sample preparation:

- ✓ Reliability of results
- ✓ Sensitivity
- ✓ Reproducibility

Poor sample preparation:

- ✗ False negatives
- ✗ Re-testing
- ✗ Higher costs

Benefits

The PurifiX® range of products has been designed to enable you to:

Gain money

Gain independence

Gain time

	Type	Simultaneous volume
PFS+	Manual kit	1 sample
PurifiX® 10	Automated device	Up to 10
PurifiX® 8	Automated device	Up to 8

At least one of the solutions in the PurifiX® range will meet your needs, as the range adapts to your:

- **Volumes**

Purification solutions ranging from 1 to 10 samples simultaneously.

- **Time and schedule**

Gain autonomy & control to perform analyses according to your schedule.

- **Uses and targets**

Purified samples ready for the analyses of your choice.

- **Internal skills**

Manual or automated solutions tailored to internal skills.

**Find the solution you need for the
security of your production**
